III. Description of the functioning of the State-trading enterprises

Add:

18. The scheme for canning peaches is primarily aimed at the promotion of orderly marketing of canning peaches with a provision for a measure of price protection, proper grading and payment according to quality. The scheme merely enables the Peach Board to prohibit the sale of peaches by producers to canners, except in accordance with a written contract which must at least provide for the sale of such peaches at prices according to grade. The Board also has the power to fix a minimum price for such sales.
