## Committee on Customs Valuation

### DECISION ON THE VALUATION OF CARRIER MEDIA BEARING SOFTWARE FOR DATA PROCESSING EQUIPMENT

Adopted by the Committee on 24 September 1984

The Committee on Customs Valuation DECIDES as follows:

1. It is reaffirmed that transaction value is the primary basis of valuation under the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade (the Agreement) and that its application with regard to data or instructions (software) recorded on carrier media for data processing equipment is fully consistent with the Agreement.

2. Given the unique situation\* with regard to data or instructions (software) recorded on carrier media for data processing equipment, and that some Parties have sought a different approach, it would also be consistent with the Agreement for those Parties which wish to do so to adopt the following practice:

In determining the customs value of imported carrier media bearing data or instructions, only the cost or value of the carrier medium itself shall be taken into account. The customs value shall not, therefore, include the cost or value of the data or instructions, provided that this is distinguished from the cost or the value of the carrier medium.

For the purpose of this Decision, the expression "carrier medium" shall not be taken to include integrated circuits, semiconductors and similar devices or articles incorporating such circuits or devices; the expression "data or instructions" shall not be taken to include sound, cinematic or video recordings.

3. Those Parties adopting the practice referred to in paragraph 2 of this Decision shall notify the Committee of the date of its application.

4. Those Parties adopting the practice in paragraph 2 of this Decision will do so on a most-favoured-nation (m.f.n.) basis, without prejudice to the continued use by any Party of the transaction value practice.
